

Ray Borrett

I have been a senior boat owning member since 2000. HBYC prior to that. I have been an actively contributing member by being on the GC and a previous Commodore. I am currently on the Development committee and the Marina project committee. So I don't just talk about what we should be doing, I try to make it happen.

I am a retired Mechanical Engineer and happy to put something back into the club and the sport that I enjoy.

I have sailed in my own yachts on a regular basis in the bay, ORCV events, Hammo, Pittwater to Coffs, Adelaide to Port Lincoln etc. so have a reasonable understanding of the sport and the needs of boat owners. I have owned quite a number of boats over the years from cruisers to racers, and have supported the local contractors financially, as well as the Club.

As the Club is going through a significant period of change, some continuity of people and experience will be required, and I am happy to be part of the driving force in making the changes happen efficiently and in the best interests of the Club.

I hope to be elected again to be an active member of the GC.
